The NDR's Problem Driver Pointer System (PDPS) is a central repository of information that identifies individuals whose license to operate a motor vehicle has been denied, suspended or revoked for cause, or who have been convicted of certain serious traffic related violations. The information on the PDPS is reported to and maintained by the States who are responsible to review information from PDPS and to take adverse action as determined necessary against problem drivers. While NHTSA operates the system to provide the information to the States, the determination of whether or not to license an applicant driver remains the responsibility of a State using the system. Upon restoration of the driving privilege, the pointer records are removed by the State-of-Record.
